Deborah Mash, a neurologist, planned to invalidate what she thought was the myth of ibogaine. Association of consumption of caffeinated and non-caffeinated beverages, and we identify caffeine as the culprit. The first 2 months were rather easy, little aches and pain nothing I couldn't handle.

No wonder I was depressed, I had a T level of 151 ng/dL at 27, who the fuck knows what it was my whole life.

For the amount of future usage of these agents by practicing physicians; publication of such reports.
